
What's the difference between RemoteDBA and Consultancy on Demand?

What is Triton's RemoteDBA service?

RemoteDBA is designed for mission critical environments, where support is required urgently to recover an unavailable or poorly performing DB2 database – at any time of day, evening or night.

remotedba 

This is when you need RemoteDBA

3:00am Tuesday:

- ▮▮ The database is performing badly... it has to be fixed before tomorrow's peak"

2:00pm Sunday:

- ▮▮ My database is down and I need it recovering fast"

What is Triton's Consultancy on Demand service?

Consultancy on Demand (CoD)
is designed for customers who
need Triton skills, support, advice on
the design and management
of their DB2 system.

This is when you need CoD

- 📄📄 "Can you spend 3 days with me designing our new DB2 High Availability system"
- 📄📄 "Please explain the commands I can use to monitor database performance"
